

## Bleeding Tissue Paper Postcards

### Materials:

- White crayon
- Bleeding tissue paper squares
- Watercolor postcard
- Spritzer bottle

### Not included:

- Water
- Paper towel/old towel

### Video Instructions:

<https://shorturl.at/tKNR9>

### Instructions:

1. Draw a pattern on the postcard with the white crayon. Do something geometric or organic.
2. Trace over your drawing several times with the white crayon, pressing hard. You want the wax layer to be thick.
3. Place the postcard on a couple paper towels or one old towel, and fill the spritzer bottle with water.
4. Spray the postcard with water until it starts to bow a little
5. Place the bleeding tissue paper squares on the postcard, getting the edges of the tissue paper as close together as possible without overlapping too much.
6. Spray the postcard and tissue paper with the water a second time.
7. Let it dry for 30 min to an hour.
8. Remove the dried tissue paper.

Tip: if you aren't sure what to draw, google nature patterns or geometric patterns.
