

String Art Shamrock

Materials:

- Paper
- Scissors
- Pencils
- Sewing pins
- 2 skeins of embroidery thread
- Board

Instructions:

1. Start by cutting out the shape of a shamrock leaf to use as your pattern. Or cut out a whole shamrock to use as a pattern.
2. Trace the leaf 4 times onto your board with the pencil to create a 4 leaf clover.
3. Use the sewing pins to create a border along the traced line of your shamrock. I suggest putting pins in the significant points of the shamrock, like the edge of the leaves, and then placing pins equidistant between those points, and continuing until you have a pin every inch or so.
4. Once you have your pin border, tie one edge of the embroidery thread on a starting point and then begin looping the thread along other pins in the design. It can be a specific pattern, or it can be organic.

Example Shamrocks:
