HARRISON TOWNSHIP PUBLIC LIBRARY

ADULT TAKE & MAKE

WOOD SLICE TURKEY MAGNETS

INSTRUCTIONS

You will need:

- Wood slice
- 5 to 7 fake leaves
- Googly eyes (or black beads)
- Red, orange, and yellow craft foam (small pieces)
- Magnet tape or a magnet to glue on the back
- Glue gun
- Scissors

Step 1: Gather your supplies. Cut a beak from the orange foam, a teardrop shape from the red foam (wattle), and two feet from the yellow foam. You can use the attached templates as a guide if needed.

Step 1

Step 2

Step 2: Start by adding a line of hot glue to the front of the one leaf, near the bottom. Place it on the **back** of the wood slice, near the top, so it's sticking out a bit.

Step 3: Glue your other leaves on either side of the first one, overlapping a bit. Remember to add glue to the front of the leaves. Repeat with your other leaves, remembering to overlap them.

Step 4: Once those leaves are glued down, flip your wood slice over to its front. Glue two leaves on the front of the wood slice facing outward as if they are framing the turkey's face. See back of this page for a photo.

Step 4

Step 2

Step 5: Glue your googly eyes onto the slice in your desired position. Then, add your beak and wattle. Finally, add your feet by gluing them to the back of the wood slice so that they stick out of the bottom (see photo below).

Step 6: Glue or stick your magnet to the back of your wood slice.

Your turkey magnet is complete!
